OFFICIAL

## In the claims:

· For the Examiner's convenience all pending claims are presented herein. Those claims that remain unchanged by this amendment are prefixed with "(Unchanged)". Please amend the claims as follows:

1      1.      (Twice Amended) A method for managing entertainment system data,

2 comprising:

3      obtaining a record corresponding to a first entertainment selection [that is

4 selected];

5      presenting a first set of entertainment system data in the obtained record

6 corresponding to the first entertainment selection on a display device;

7      presenting a selectable identifier corresponding to the [a] first set of

8 entertainment system data [in the obtained record on a] on the display device; [and]

9      performing a search for a second entertainment selection having a

10 corresponding second set of entertainment system data related to the first set of

11 entertainment system data when the selectable identifier is selected; and

12      presenting a result of the search on the display device.

1      2.      (Unchanged) The method of Claim 1, wherein obtaining the record

2 comprises referencing an entertainment selection identifier of the first entertainment

3 selection in a database.

Docket No. 042390.P6489
Application No. 09/183,282          -2-

1  3.  (Unchanged) The method of Claim 1, wherein presenting the selectable

2 identifier comprises generating an identifier that is distinguishable from non-selectable

3 text.

1  4.  (Unchanged) The method of Claim 1, wherein performing the search

2 comprises searching a database for the entertainment system data related to the first set of

3 entertainment system data.

1  5.  (Unchanged) The method of Claim 1, wherein presenting the result of the

2 search comprises displaying the result of the search in a synopsis box on the display

3 device.

1  6.  (Amended) A computer-readable medium having stored thereon a

2 sequence of instructions, the sequence of instructions including instructions which, when

3 executed by a processor, causes the processor to perform <u>operations comprising</u> [the steps

4 of]:

5    obtaining a record corresponding to a first entertainment selection [that is

6 selected];

7    <u>presenting a first set of entertainment system data in the obtained record</u>

8 <u>corresponding to the first entertainment selection on a display device</u>;

9    presenting a selectable identifier corresponding to <u>the</u> [a] first set of

10 entertainment system data [in the obtained record on a] <u>on the</u> display device; [and]

11    performing a search for a second entertainment selection having a

12 corresponding second set of entertainment system data related to the first set of

13 entertainment system data when the selectable identifier is selected; and

14    presenting a result of the search on the display device.

Docket No. 042390.P6489
Application No. 09/183,282   -3-

1    7.    (Unchanged) The computer-readable medium of Claim 6, wherein

2    obtaining the record comprises referencing an entertainment selection identifier of the

3    first entertainment selection in a database.

1    8.    (Unchanged) The computer-readable medium of Claim 6, wherein

2    presenting the selectable identifier comprises generating an identifier that is

3    distinguishable from non-selectable text.

1    9.    (Unchanged) The computer-readable medium of Claim 6, wherein

2    performing the search comprises searching a database for entertainment system data

3    related to the first set of entertainment system data.

1    10.    (Unchanged) The computer-readable medium of Claim 6, wherein

2    presenting the result of the search comprises displaying the result of the search in a

3    synopsis box on the display device.

1    11.    (Amended) A system control agent, comprising:

2    a data parser that formats entertainment system data into an identifier

3    portion and a data portion;

4    a data engine, coupled to the data parser, that stores the entertainment

5    system data into a database according to corresponding entertainment selections; and

6    a query interface, coupled to the database, that configures a graphical user

7    interface (GUI) having an identifier corresponding to a first set of entertainment system

8    data of a first entertainment selection, the identifier being [is] selectable to display a

9    second entertainment selection having a corresponding second set of entertainment

10    system data related to the first set of entertainment system data.

Docket No. 042390.P6489
Application No. 09/183,282                -4-

1      12.    (Unchanged) The system control agent of Claim 11, wherein the query

2 interface comprises:

3            a user interface unit that receives an identity of the identifier selected;

4            a database interface unit, coupled to the user interface, that searches the

5 database for the second entertainment selection having the corresponding second set of

6 entertainment system data related to the first set of entertainment system data; and

7            a synopsis box building unit, coupled to the database interface unit, that

8 displays the identity of the second entertainment selection on a display device.

1      13.    (Amended) A computer system, comprising:

2            a bus;

3            a processor coupled to the bus;

4            a system control agent, coupled to the bus, that includes a data parser that

5 formats entertainment system data into an [a] identifier portion and a data portion, a data

6 engine that stores the entertainment system data into a database according to

7 corresponding entertainment selections, a query interface that configures a graphical user

8 interface (GUI) having an identifier corresponding to a first set of entertainment system

9 data of a first entertainment selection, the identifier being [is] selectable to display a

10 second entertainment selection having a corresponding second set of entertainment

11 system data related to the first set of entertainment system data.

1      14.    (Unchanged) The computer system of Claim 13, wherein the query

2 interface comprises:

3            a user interface unit that receives an identity of the identifier selected;

4            a database interface unit, coupled to the user interface, that searches the

5 database for the second entertainment selection having the corresponding second set of

6 entertainment system data related to the first set of entertainment system data; and

Docket No. 042390.P6489
Application No. 09/183,282        -5-

7          a synopsis box building unit, coupled to the database interface unit, that

8    displays the identity of the second entertainment selection on a display device.

1        15.    (Amended) A graphical user interface (GUI), comprising:

2          a first set of entertainment system data corresponding to a first

3    entertainment system selection;

4            an identifier corresponding to the [a] first set of entertainment system data

5    of the [a] first entertainment selection, the identifier being [that is] selectable to generate

6    a synopsis box that displays a second set of entertainment system data of a second

7    entertainment selection, the [with a] second set of entertainment system data being

8    related to the first set of entertainment system data.

1        16.    (Unchanged) The method of Claim 1, wherein performing the search

2    comprises performing a search of records of entertainment system data received from a

3    plurality of different sources.

1        17.    (Unchanged) The method of Claim 1, wherein the entertainment selections

2    are selected from the group comprising programs, music selections, software

3    applications, files, and Internet broadcasts.

1        18.    (Unchanged) The method of Claim 1, wherein performing the search

2    comprises performing a search in accordance with instructions stored with the first set of

3    entertainment system data to find other entertainment selections.

1        19.    (Unchanged) The method of Claim 1, wherein the second set of

2    entertainment data is related to the first set of entertainment data in that an item of data

3    corresponding to the same trait is the same in both sets of data.

Application No.: 09/183,282
Docket No.: 042390.P6489        6

1     20.     (Unchanged) The computer-readable medium of Claim 6, wherein

2   performing the search comprises performing a search of records of entertainment system

3   data received from a plurality of different sources.

1     21.     (Unchanged) The computer-readable medium of Claim 6, wherein the

2   entertainment selections are selected from the group comprising programs, music

3   selections, software applications, files, and Internet broadcasts.

1     22.     (Unchanged) The computer-readable medium of Claim 6, wherein

2   performing the search comprises performing a search in accordance with instructions

3   stored with the first set of entertainment system data to find other entertainment

4   selections.

1     23.     (Unchanged) The computer-readable medium of Claim 6, wherein the

2   second set of entertainment data is related to the first set of entertainment data in that an

3   item of data corresponding to the same trait is the same in both sets of data.

1     24.     (Unchanged) The system control agent of Claim 11, wherein the

2   entertainment system data is received from a plurality of different sources.

1     25.     (Unchanged) The system control agent of Claim 12, wherein the database

2   interface unit searches the database in accordance with instructions that it retrieves from

3   storage with the first set of entertainment system data.

1     26.     (Unchanged) The GUI of Claim 15, further comprising non-selectable text

2   corresponding to entertainment system data of the first entertainment selection.

1     27.     (Unchanged) The GUI of Claim 26, wherein the selectable identifier is

2   presented so that it is distinguishable from non-selectable text.
